

**Our Client:**

Geldof is a leading supplier of industrial components and turnkey-projects for the storage, handling and processing of solids, liquids and gasses.

They engineer and fabricate dry bulk storage and handling equipment, storage tanks, pressure vessels and integrated projects.

The core of their organization is Integrated Project Management, supported by Business Development, Operations and Procurement. Steel is the backbone of all of their realizations.

They offer their customers in Europe and other parts of the world the ability to leverage for their strategies in the form of A-Z solutions, renowned for their quality, functionality and durability.

Geldof serves a broad range of industries with many projects related to energy, environment, oil and gas, chemical, biochemical and petrochemical, metal working, mining and bulk food, among others. Their customers include both major principals and engineering contractors.

To reinforce their centralized procurement team in Harelbeke, we are currently looking for a:

## **Senior Buyer Subcontracting**

**Harelbeke**

**Job description:**

- You are responsible for the project related and technical purchasing for a wide portfolio of services and on-site activities mainly towards the construction of storage tank terminals with a multi-technical scope (civil works, electricity, instrumentation, steel construction, etc).
- You will work in project teams together with your internal clients from engineering, sales, quality, legal and finance where early involvement of the procurement department is required.
- You will identify the lowest TCO by taking into account correct scope definition, project milestones, risk - and contract management striving for strategic partnerships. Most of your suppliers are located in Europe yet depending on the worldwide geography of the project, local content suppliers are sometimes required.
- You understand your supplier market. You understand the key cost drivers of your specific business area. You develop and evaluate your suppliers on a regular basis and make sure the supplier evaluations are in place.
- Where possible you will support the CPO in the further growth and optimization of the procurement department and its processes.
- You have an up to date market knowledge and will search for new opportunities with a focus on maximum cost efficiency.
- You will indirectly manage a team of procurement administrators and will directly report to the CPO.

**Competences:**

- You preferably have a degree in Industrial or civil Engineering or equal through relevant experience.
- You have a proven track record of 5-10 years within a technical procurement role, preferably in a project related environment.
- Experience with subcontracting and/or outsourcing is a big asset.
- You are fluent in Dutch and English. Other languages such as German and French are an advantage.
- You are detail- and result oriented, stress-resistant and efficient.
- You are assertive, communicative and possess the necessary influencing skills to align in all levels in-and outside the organization.
- You are very commercial and possess the necessary negotiation skills.
- You are willing to travel +/- 20 % of your time (mainly in Europe).

**Conditions:**

Geldof offers you a position in a growing, financially and socially stable international environment. Besides this challenging opportunity they offer an interesting salary package including company car and benefits.

**The position is based in:**

Harelbeke, West Flanders
