

INNOGENETICS[®]
BIOTECHNOLOGY FOR HEALTHCARE

Innogenetics NV is a global diagnostic company that develops and markets diagnostic products to improve therapy management and patient health. Innogenetics NV, a daughter company of the Japanese Fujirebio/Miraca group, is based in Ghent.

Innogenetics develops and markets a wide range of diagnostic assays with a focus on molecular diagnostics and multiparameter testing. Its products are sold in over 90 countries through its 6 subsidiaries and a large number of distributors.

To support his renewed strategy, Innogenetics is strengthening his Supply Base Department with this position

Buyer

The job - Baseline

Direct responsibility for the tactical sourcing of all commodities, materials, services and capital goods investments in order to provide company wide the 'best' buy, considering cost, quality, delivery and regulatory requirements.

Direct and co-ordinate the purchase of assigned materials/services at the lowest possible long-term value, quality and compliance, thus allowing maximisation of profits of those divisions for which the materials are procured.

The job - Accountabilities:

- Direct and co-ordinate the **purchase** of assigned materials/services at the lowest possible long-term value, quality and compliance, thus allowing maximisation of profits of those divisions for which the materials are procured.
- **Strategic Sourcing:** Purchase materials and/or services at the best price, terms of delivery, quality and service in order to provide best total value to the company. This includes conducting market analysis, performing supplier evaluations, RFQ, competitive contract negotiations, managing suppliers in terms of on-time deliveries, quality, cost of material and supplies and maintaining market intelligence.
- Organisation capacity: **Promote purchasing as an 'added value service'** in the organisation in order to improve customer satisfaction, to have productive relationships and to achieve an early involvement of purchasing in the process. This includes leading cross-functional project meetings, ensuring good communication with internal customers.

- **Administer data in the ERP-system** for non-operational transactions: implement changes, follow-up on investments and contracts. Operational ERP-knowledge to ensure smooth business continuity as back-up. This includes entry and follow-up of master data and purchase orders.
- Participate in the **optimisation of procedures and policies** in order to improve/facilitate purchasing efficiency/methods, by optimising procedures and policies and implementing new technologies in the purchasing process.
- **Performance reporting**: Monthly operational KPI reporting over preset targets, objectives and timelines, communicating towards colleagues, department heads and internal customers, in order to adequately focus or re-focus efforts.

Profile

- Degree in economics
- 3 – 5 years in depth purchasing experience in a production environment (biotechnical or pharmaceutical sector is an advantage)
- Technical understanding, strong negotiation skills, experience in sourcing, category planning and supplier assessment/audit
- Result-oriented
- Customer focus
- Pro-active/adaptability
- Fluent in English, Dutch & French – basic German
